FLEXIBLE
SCHEDULING

OSHA
COMPLIANT
REPORTS
PROVIDED

NIOSH, COHC,
AND OSHA
TRAINED &
CERTIFIED
TECHNICIANS

PROTECT HEARING. PROTECT PEOPLE.

Audiometric testing monitors an employee's **hearing over time**. It also provides an opportunity for employers to educate employees about their hearing and the need to protect it.

Employers are required to monitor noise exposure levels in a way that accurately identifies employees exposed to noise at or above **85 decibels (dB)** averaged over 8 working hours, or an 8-hour time-weighted average (TWA).

Let us help you achieve and maintain
OSHA 1910.95 regulatory compliance.

EARLY DETECTION. LONG-TERM IMPACT.

Hearing loss from workplace noise exposure is preventable - but only if it's detected early.

Regular hearing assessments help protect your team, improve quality of life, and keep your company in compliance.

Workplace hearing protection starts with TVTC.
